

# PrEP / PEP

The role of PrEP and PEP in Combination HIV Prevention

## Educational Workshop and Luncheon

Hosted by LAGPA and Sponsored by Gilead

Sunday, April 30, 2017 • 12-3:30 PM

Why PrEP? Why PEP? Who will use them?  
What would be the long-term consequences of these bio-medical interventions?  
What do your clients ask? What do you say?

This workshop brings together experts in the field to inform you about the medical research concerning PrEP and PEP besides explore the recommendations of mental health professionals and therapists who have first hand knowledge and experience dealing with LGBT clients. Moderated by LAGPA board member Fred Wilkey, Ed.D., respected therapist with a private practice in West Hollywood.

At the completion of the presentation, participants will:

- (a) Better understand the use of Pre-Exposure Prophylaxis (PrEP) as a new HIV prevention tool,
- (b) Be aware of current guidelines and recommendations for the use of PrEP in HIV negative individuals, and
- (c) Know how to identify candidates for PrEP and where and how to find additional PrEP-related resources.
